***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

none of the prior art of record discloses or suggests a method for changing the body temperature of a human or animal subject while controlling subject shivering, comprising:

- A) providing a heat exchange catheter;
- B) positioning the heat exchange catheter in the vasculature of the subject;
- C) administering to the subject at least one drug of a type selected from the group consisting of; serotonin agonists, dopamine antagonists, dopamine agonists, sedatives, hypnotics and anxiolytics, said at least one drug being administered at a dose and by a route of administration that is effective to deter shivering during performance of the method; and
- D) using the heat exchange catheter to transfer heat from blood flowing through the subject's vasculature.

Dobak, III (6,149,677) is the most relevant prior art, but lacks the disclosure of step C) above to deter shivering.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
